

**AREN'T ALL SCORE BOOKS THE SAME?**

# **NO!** *Introducing the ilovetoscore.com* **BASEBALL SCOREBOOK**

Over the past few years, scoring ball games had become a frustrating experience. I have tried almost every scorebook available and found flaws in each and every one. Most scorebooks are designed for softball, wasting space on non-baseball related items like the tenth player. The books are either too big to be conveniently carried or too small to legibly score a game. Something had to be done!

The ilovetoscore.com scorebook is designed solely for the baseball fan. It contains scoring instructions and enough pages to score 40 games. The book measures 9 x 12 inches; small enough to be easily carried to a game, yet large enough to provide ample room on each page. They are sturdy too! Wire binding and a cardboard back insure the durability of this book through the dog days of summer and beyond!

## **JUST A FEW OF THE NEW AND IMPROVED FEATURES:**
